“St. Luke’s therapists helped a lot. After four sessions I no longer had difficulty getting out of bed in the morning.”
*Bill Smithpeters, previous St. Luke’s patient*

**Treatment Goals**
- Thorough evaluation
- Individualized treatment plan created by the therapist with patient and physician input
- Quicker recovery and improved outcomes with goal-focused treatment
- Improved patient functionality and independence

**Treatment Resources**
Our therapists are highly trained and hold additional specialized certifications to help your patients recover from injury or illness.
