Neurogenic Bowel and GI Complications of Spinal Cord Injury

Presenter: Vivian M. Moise, MD, Spinal Cord Program Medical Director

Date: Monday January 5, 2015
Time: 4 - 5:30 p.m.
Place: St. Luke’s Rehabilitation Institute
Room 200

Intended Audience:
St. Luke’s staff, and health care partners throughout the region are invited. Lectures are intended for all medical professionals who treat people with spinal cord injury.

Presentation Objectives:
1. Understand the difference between an upper motor neuron and lower motor neuron bowel program.
2. Know how the gastro-colic reflex affects success with an SCI bowel program.
3. Be familiar with the many upper GI complications of SCI in the acute care period, and how they relate to abnormal autonomic innervation of the upper GI tract.
4. Understand the cause of high constipation with SCI and know how to treat it.

Video Conferencing Available over the NW TeleHealth Network
Please contact your local site coordinator to register at least one week prior to the event. For questions, please contact: NW TeleHealth at (509) 789-4960
