

I would recommend St. Luke's to anyone. Getting Ron in a hospital focused on rehab was crucial to helping him get to where he is now.

— Karen McQuarrie, wife of former St. Luke's stroke patient, Ron

Patient Satisfaction

Based on a national survey (MedTel Outcomes) patients rated the following:

- 94%** felt prepared to go home
- 94%** satisfaction with St. Luke's
- 91%** progress at St. Luke's met patient expectations
- 93%** reported an improved quality of life

Patients Served

A cerebral vascular accident (commonly called a stroke) can happen to anyone at any age. In 2019, St. Luke's provided inpatient rehabilitation services to more than **567** patients who suffered a stroke, with an average length of stay of **14.6** days in the hospital.

70.3 years old
average patient age

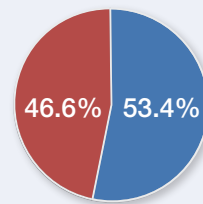

69% were discharged
to the community

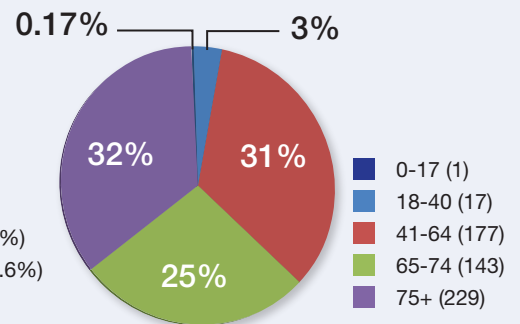

89% of our patients were
living in the community 90
days after discharge

Ages of patients in the Stroke program:

Age	Number of Patients
0-17	1 (0.17%)
18-40	17 (3%)
41-64	177 (31%)
65-74	143 (25%)
75+	229 (32%)

■ male (53.4%)
■ female (46.6%)

■ 0-17 (1)
■ 18-40 (17)
■ 41-64 (177)
■ 65-74 (143)
■ 75+ (229)

Stroke rehabilitation services are provided to patients by St. Luke's experienced team of physicians, rehabilitation nurses, case management and therapy staff including physical, occupational, psychology, recreational, speech and other therapists. Our patients receive an average of **3.5 hours** of therapy a day.

Support Group

St. Luke's offers a support group for patients who have suffered a stroke. The group meets every third Thursday of the month from 3-4 p.m. Please call the Support Group Hotline at 509-473-6681.
